

CALL IS MADE BY PRESIDENT

Congress Will Convene On March 15 In Special Session, The Business Not Being Named In Call.

SIX CABINET MEMBERS TAKE OATH

Loeb's Position As Collector Of The Port Is Confirmed By The Senate This Afternoon--Little Other Business Done.

Washington, D. C., March 6.—President Taft's official act of importance today was the issuing of the official call for the special session of congress to convene on March 15.

Not Named.

The reasons for the calling of the special session are not named in the call issued today but it is expected that they are the same as have been before named and that the most important of these will be tariff revision.

Is Belegged.

President Taft is already beleaguered by visitors who have been forced to remain in Washington owing to the disarrangement of train schedules and office seekers. Taft was early at his desk and saw many important callers.

Take Their Oath of Office.

Six members of the new President's cabinet who were confirmed yesterday took their oath of office this morning. They were Knox, Hitchcock, Meyer, Bailew, Wilson and Nagel.

No Nominations.

The President made no new nominations to the Senate this morning and it is not expected that he will have to be confirmed for the present or until the first of the coming week at least.

Confirm Loeb.

The Senate today confirmed the nomination of William Loeb, Jr., to be collector of the port of New York and Beckman Whitworth to be assistant secretary of the navy.

Were Too Late.

The Senate today adjourned until the fifteenth instant. The credentials of Senator-elect Stephenson of Wisconsin, failed to arrive in time to permit him to be sworn in.

FORESTRY STATION BENEFIT TO STATE

Final Decision of Local Experimental Laboratory at Wisconsin Received With Satisfaction at State University.

Madison, Wis., March 6.—The announcement of the decision of Secretary of Agriculture Wilson to locate the experimental laboratory station at the University of Wisconsin was received with great satisfaction by the university authorities and others interested.

The practical value of the work of the laboratory to the lumber, paper, tanning and furniture interests of the state makes the location of the laboratory at the university even more significant than the advantages which will accrue to the institution through the opportunity which will be given students and instructors in research and instructional work in forestry.

In accordance with the offer of the regents a building constructed for the plans of the Forest Service will be erected at the earliest possible date at a point on the university campus convenient to the colleges of agriculture and engineering and with adequate side-track facilities for handling the materials to be tested.

The proposal made by the Forest Service is to to the university at a cost of \$14,000, and to provide the entire staff of investigators, whose salaries will aggregate \$28,000 a year.

It is proposed to concentrate all experimental work in forestry carried on by the United States government east of the Rocky Mountains, at the station here.

The work of the laboratory is to include tests of various kinds of wood for the manufacture of pulp for paper, for their strength for building material, as well as for various other purposes. Wood specimens are to be determined the best methods of securing turpentine, alcohol, and resin from wood waste is also to be carried on on a large scale.

"Means Much to Wisconsin," Says Van Hise.

"The location of the United States Forest Service Laboratory at the university means much to the state of Wisconsin and to all the varied interests the success of which depends upon the effective utilization of forest products," said President Charles R. Van Hise of the University of Wisconsin when shown the newspaper dispatch announcing Secretary Wilson's decision.

"In view of the fact that a large part of Wisconsin is still covered with forests, and that a considerable portion of this state is permanently being adapted to forestry than any other purpose, the work of the laboratory should have a direct practical relation to the manufacturing development of the state.

"The establishing of the forestry laboratory at the university completes the provision which has been made at Wisconsin for the investigation of our most effective means of utilizing our natural resources. Our colleges of agriculture, engineering, and letters and science have been undertaking to solve the problem of our agricultural and mineral resources as well as those relating to our commercial and manufacturing interests. The utilization of our forest products is the only important field of investigation which the university has not been able to undertake hitherto, because of a lack of funds.

"The forestry station at Madison will provide at once for the investigation of the utilization of forest products which concerns directly the paper, tanning, lumber and furniture interests both of Wisconsin and of the whole lake state forest belt. It will thus be possible to do what the university would have been glad to do had money been available.

"A course for forest rangers will be provided by the university as soon as funds become available for this purpose.

A MARCH DAY.

GO-AS-YOU PLEASE RACE IN NEW YORK

Seven Foreign Countries Will Be Represented in Big Six-Day Event in New York.

New York, March 6.—Twenty-two teams of professional pedestrians, hailing from many countries of the world, will start in the six-day go-as-you-please race at Madison Square Garden tomorrow night, one minute after the midnight hour.

The race will mark a revival of the long-distance pedestrian contests which enjoyed wide popularity in England and America during the decade beginning about 1875. In the late sixties and early eighties six-day walking matches were held with great success in New York, Boston, Chicago, San Francisco and other cities.

Among the noted star pedestrians of those days were E. J. Weston and Dan O'Leary, both of whom are still living. "Old Sport" Champion, who died in Chicago a few years ago, and William Galt and Peter Crossland, who hailed from England. The first regulation six-day go-as-you-please contest in this city was held in December, 1878, and was won by Dan O'Leary, who covered a fraction over 400 miles and received \$2,000 for the performance.

The coming contest in Madison Square Garden will differ from the old-time races in that it will be a team competition, one man from each team being at all times actively in the contest and actually on the track.

The foreign countries that will be represented in the race are England, Ireland, Wales, France, Italy, Holland and Belgium.

CONTEST PROMISES TO BE BITTER ONE

Campaign for State Superintendency of Public Instruction Was Opened Today.

Madison, Wis., March 6.—The filing of the nomination papers of W. C. Hewitt of Oshkosh in the office of secretary of state today marks the beginning of a noteworthy and almost bitter campaign for the office of state superintendent of public instruction.

To the position were affixed the signatures of 12,300 names of citizens from all sections of the state. Mr. Hewitt, who was one of the first to announce his candidacy, has been in active contact with the voters of the state and has been making a personal appeal to them.

There are evidences of some activity on the part of other candidates for the office, notably the present superintendent, Charles P. Cary, whose campaign literature, summarizing the accomplishments of the past season, has been placed upon the desks of the members of the legislature. One feature marks the campaign thus far, and that is that it will be an appeal to those voters who are particularly interested in educational matters.

Three years ago the office by constitutional amendment was made a non-political one, by changing the time of election from the fall to the spring, allowing non-political candidates to enter into the contest.

Although the election is to be held on April 6, one month from today, Mr. Hewitt is the only man to file his papers, but the position and probably will be filled some time next week in order to appear on the ballot.

In addition to the first two mentioned, J. T. Hooper of Ashland, city superintendent of schools in that city, is making an active campaign, aided largely by a number of his university classmates and friends. A large part of the opposition, however, centers around L. W. Wood of Neillsville, formerly state rural school inspector. Mr. Wood is making a personal campaign, visiting various county school conventions and making himself known in every community. One of his planks in his "platform" is to have aggressive members on the school boards of the state.

BIG AUTO SHOW OPENS IN BOSTON

Claimed to be Largest and Most Representative Exhibit Ever Brought Under One Roof.

Boston, Mass., March 6.—Everything is in readiness for the opening of the Boston Automobile Show in Mechanics Building tonight, following months spent in perfecting plans and making ready for what is pronounced to be the largest and most representative display of motor cars and accessories ever brought together under one roof.

The exhibition will continue through the coming week.

The show embraces the cream of the exhibits seen at the automobile shows held earlier in the season in New York and Chicago. In addition there are a number of cars that are entirely new and have not heretofore been exhibited. The display as a whole is declared to be the most comprehensive and elaborate exhibit of its kind ever attempted in America, representing as it does the combined efforts of millions of capital in the best engineering talent in the world.

Practically every foot of floor space in the main hall and spacious basement of the Mechanics Building is filled with the exhibits. Of course, the various machines themselves are the center of interest. The American makes predominate in numbers and include the latest models turned out by all of the prominent manufacturers.

The display of motor car sundries is large and interesting and the decorations of the exhibition halls are far more elaborate and costly than those seen at previous shows.

BRIEF LULL IN NATIONAL AFFAIRS THE COMING WEEK

Motor Car Exhibitions In Milwaukee And Many Other Cities--Forecast Of News Events.

Washington, D. C., March 6.—The week will witness a lull in national affairs, following the excitement of the presidential inauguration and preceding the opening of the special session of congress called to revise the tariff.

Now Come the Appointments.

President Taft probably will keep busy. Much routine business awaits his attention and numerous appointments are yet to be made as a consequence of the change in the administration. Senators and representatives, including many newcomers, will gather in the capital in readiness for the opening of the special session of congress.

Ex-President Roosevelt Will Spend the Week at his Home in Oyster Bay, with a possible visit to New York in connection with the preparations for his trip to Africa.

In the Social World.

The customary London dullness will prevail in society both at home and abroad. Washington society will undergo its quadrantal shake-up occasioned by the departure of many high officials and their wives and daughters who have been leaders in the social whirl during the Roosevelt administration.

Motor Car Exhibitions.

Motor car exhibitions in Milwaukee, Kansas City, Boston and Portland, Ore., will divide the attention of the automobile world. Devotees of the national game will find much to interest them in the reports from the southern training camps, where the teams of the major leagues will be engaged in practice work preliminary to the opening of the championship season next month.

At Home and Abroad.

Other events and happenings that will contribute to the news of the week will include the progress of the Standard Oil rebate trial in Chicago, the proceedings of the state legislatures in session, a national reunion of the Blue and the Gray in Fitzgerald, Ga., the result of the general elections in Italy, and possible developments with regard to the critical situation in southeastern Europe.

BOY TO DIE IN ELECTRIC CHAIR

WALTER ZELLER WILL BE EXECUTED AT TRENTON, N. J.

FOR MURDER OF OLD MISER

William Read, Who Was Also His Grandfather--Two Accomplices Will Serve 30 Years in Prison.

Trenton, N. J., March 6.—Unless a stay of execution is secured, Walter Zeller, an eighteen-year-old youth, will die in the electric chair in the state prison here during the coming week. He was convicted of complicity in the murder of his grandfather, William Read, near Vineland last November. His boyhood playmates and accomplices in crime, Herbert Grigg and Cline Wheeler, will spend thirty years at hard labor in the state prison.

The murder of which the three youths were convicted entails a story that has never been equaled in South Jersey. The aged victim, known throughout Cumberland County as a miser, was formerly a prominent contractor. He amassed considerable wealth, some ten or twelve years ago, when he was erecting a floor of a building he was erecting in Paterson. He was discharged from the hospital a cripple.

Gradually his physical infirmity extended to his brain and he was no longer capable of holding the reins over hundreds of mechanics. He retired and lived for some time in West Philadelphia.

Then he became eccentric and a burden to his caretakers. About three years ago he moved to Vineland to live with Mrs. William Cooper, a married daughter. About the old man's affairs the daughter knew nothing. She and her husband knew that he was or at least had been rich. He often showed them a much-thumbed roll of banknotes and one day he held before their wondering eyes a package containing about \$50,000 in bonds.

Read's one delight aside from talking about his money, seemed to be to watch the hair-raising performances of his favorite grandson, Walter Zeller, and his long companions, Grigg and Wheeler, as they rehearsed their penny dreadful heroes. Imaginary Indians were scalped and belted the stage coach that might pass.

One night last fall young Zeller said: "Boys, we must have money. We must have it at once if we intend going West at all."

But that would take more money than they had ever seen, except in the palmed hand of William Read. That money would aid them to realize their ambition.

Little by little the longing for the new man's money grew, and finally it was decided that Walter should drug the old man's coffee at night, and, under the influence, obtain the money. The scheme failed. The old man nearly became ill and could not sleep.

Then it was planned to lure the old man out on the dark roadway near the house in the family's absence and overpower him. But Read refused to leave the house after dark.

Finally it was decided to take desperate measures. William Read was to be overpowered while in bed. The first attempt of this kind was frustrated. Some one entered the house by the back door. Read, alone in his little room, heard the door creak on its hinges. He arose, and, snatching his heavy cane and a revolver, shouted: "Who's there?" A wild stampede followed. The door slammed and the house was quiet again.

The second attempt followed a few nights later. The aged miser awoke to find a hand fumbling with the pocket of his blue union shirt. He always slept in his own shirt. He started to get up and was struck with his own cane. He felt for his revolver. It was gone. The figure fled, Read following them with blood streaming from a wound in his forehead. He overheard and recognized the robbers and was struck down.

After the fleeing of the old man's body it was not long before suspicion turned toward the grandson and his friends. The young men had disappeared from their usual haunts. Within a few days, however, they had been located and arrested. Young Wheeler made a detailed confession of the crime and said that Zeller had fired the shot that killed his grandfather after the latter had recognized him. Two shots were fired. The old man was dragged back and laid on the bed and his revolver placed in his hand to make it appear that he had shot himself. The three youths then hurried across the fields and into town and elsewhere their spots before sunrise. Of the thousands of dollars that the aged miser was supposed to have concealed about his person the young murderers were able to find but \$15. This they divided. Grigg received \$7, Wheeler \$5, and Zeller got \$3 as his share of the proceeds of the robbery and murder for which he is to pay the death penalty.

TRIED TO KILL TWO RACINE POLICEMEN

Brothers Run Amuck In Lake City And Are Locked Up and Fined This Morning.

Racine, Wis., March 6.—Lewis and Frank Deplis, brothers, are in jail on a charge of having attempted to blow off the heads of Policemen John Harris and John McCarthy at three o'clock this morning. The men were creating a disturbance in their home and when the officers arrived Lewis grabbed a shotgun and kept the officers out on the sidewalk and then attempted to blow off their heads. The policemen grabbed the barrel of the gun and it was discharged, the shot entering the top of Harris' hat. The brothers were disarmed and bent on submission and then taken to the station. This morning Lewis was fined \$50 and costs, and was sentenced to jail for two months. Frank got a fine of \$5 and ten days at jail.

SCANDAL INVOLVES CHICAGO CHURCHES

Suits Brought to Prevent Publication of What is Called a Confession.

Chicago, March 6.—The situation which involves the resignation of the pastor from his church, threatened the reputation of another church, and a scandal which is without foundation, was presented in a bill for an injunction which was filed in the superior court here today. The bill was filed by John Lavender, who seeks to enjoin Rev. Edward H. Crawford, pastor of the Woodlawn Park Methodist church, and the trustees and stewards of the church, with and attorneys, from publishing and circulating among church members the confession made by Mrs. Mary Lavender, wife of the plaintiff, to Rev. Crawford. The pastor who resigned was Rev. John D. Leek of the Western Avenue Methodist church.

Judge Barnes refused to issue the injunction because either side had not been notified of application.

NO STRIKE EXPECTED BY THE BREWERS NOW

Brewers And Their Workers Get Together on the Propagation of Disputes.

Madison, Wis., March 6.—At the close of a conference which lasted until this afternoon it was stated by a member of the brewers' committee that the difficulties between the employers and brewer employees would be entirely adjusted upon a satisfactory basis either before night today or on Monday morning.

GENERAL ELECTIONS IN ITALY MONDAY

On Account of War Cloud in the Balkans the Existing Government Expects Substantial Victory.

Rome, March 6.—Following a desultory campaign the general elections will take place Monday. The existing government expects a substantial victory. Its position having been considerably strengthened by recent fears of international complications arising from the imbroglio in the Balkans.

PROMINENT IOWA MAN DIES WHILE HUNTING

Passes Away at His Summer Home Near the City From Heart Trouble.

Des Moines, March 6.—A telephone message from Wapello, states that J. W. Blythe, of Burlington, dropped dead this morning while stopping at his country place. He was out hunting and died from heart disease. Mr. Blythe was one of the most prominent men of the state and was one of the leading attorneys for the Burlington railroad.

STATE RESTS CASE; THE COOPER TRIAL

Last of the Evidence of the Prosecution is Brought In and the Defense Will Have Next Hearing.

Nashville, Tenn., March 6.—The state rested its case this morning in the Cooper-Sharp trial for the murder of former Senator Carmack.

AVALANCHE IS FELT THROUGHOUT AUSTRIA

Ten Persons Known to Have Been Killed in the Small Villages in Carinthia.

Vienne, March 6.—Telegrams from Carinthia, Austria, report a series of devastating avalanches. A number of houses were swept away and it is known ten persons lost their lives.

BOY MURDERER WAS SENTENCED TODAY

Killed His Mother on Thursday And Given a Life Sentence in Prison Today.

Albion, Mich., March 6.—Elton Baldwin, who murdered his mother, Mary Baldwin, on their farm near Saginaw, Thursday, was today sentenced to life imprisonment.

CENTENARY OF THE POETESS BROWNING

Observed With Commemorative Exercises in London and Other Cities of England Today.

London, March 6.—The one hundredth anniversary of the birth of Elizabeth Barrett Browning, who is conceded throughout the English-speaking world to have been one of the greatest of women poets, was observed today with commemorative exercises held under the auspices of numerous literary societies.

Elizabeth Barrett, as she was before her marriage to Robert Browning, the poet, was born March 6, 1809. Her genius was evident from the earliest girlhood, and was fostered by her devoted parents. She began to write at 8 years of age. At 10 her father printed for her epic poem, "The Battle of Marathon." At 17 she wrote a learned essay on "Mind." At 26 her poems were already mature in thought and in art.

In 1846 she was married to Robert Browning and the greater part of her life thereafter was passed in Italy. Among her best poems are "The Rime of the Duchess May," "The Cry of the Children" and "Sonnet from the Portuguese."

Meeting for Everybody: The annual meeting of the Murphy League open to men and women will be held at the Y. M. C. A. at 5 p. m. tomorrow. Rev. J. C. Hazen of the Baptist church will speak. There will be special music. All friends of temperance and the good work of the Murphy League are urged to be present and bring their friends from 3 to 4 o'clock. Men, women and children invited.

KELLEY-RUSSELL WEDDING TODAY

Nuptials of New York Society Girl and Boston Man Attract Considerable Attention in Gotham.

New York, March 6.—A wedding of social interest today was that of Miss Jacobyn Kelley, daughter of Commander and Mrs. J. D. Jerrold Kelley, and Joseph B. Russell, of Boston, a nephew of the late Gov. William B. Russell of Massachusetts. The ceremony was performed at the residence of the bride's parents in East Eighty-third street. After a trip to the South the young couple will reside in Cambridge, Mass.

LL. D. DEGREE FOR PRESIDENT ELIOT

Tulane University Confers New Honors on Harvard's Head and Henry Vignaud.

New Orleans, La., March 5.—In connection with the Founders' Day exercises at Tulane University today the honorary degree of Doctor of Laws conferred upon President Eliot of Harvard University and Henry Vignaud.

President Eliot, who is now on a tour of the South, will deliver the address of the day.

GAVE LARGE PURSE TO THEIR PASTOR

Milwaukee Church People Present Their Minister With Twelve Hundred Dollars.

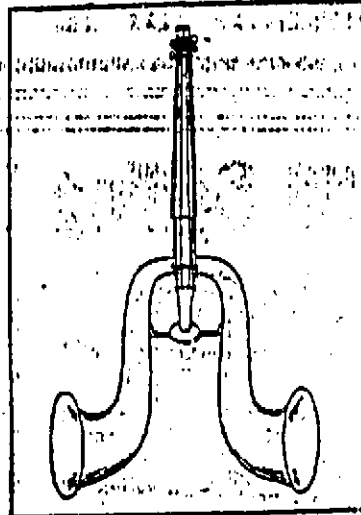

Milwaukee, Wis., March 6.—As a substantial expression of their appreciation for his work as a pastor and their personal regards for him, twenty-four men of the Immanuel Presbyterian church have raised a fund of \$1,200 for Rev. Paul B. Johnson that he may enjoy a vacation in Europe during July and August next season. The initiative in the movement was taken by Paul Allis, who is said to have headed the subscription list with \$500.

SCIENCE AND INVENTION

NEW MUSICAL INSTRUMENT

Sound From Strings Transformed Into Horn Tones.

A novel musical instrument which is a combination of brass and stringed instrument and a blend of the tones of both, has been devised by a North Dakota man. The effect consists of a backless, similar to that of a violin, fastened between two horns, shaped like the lot-

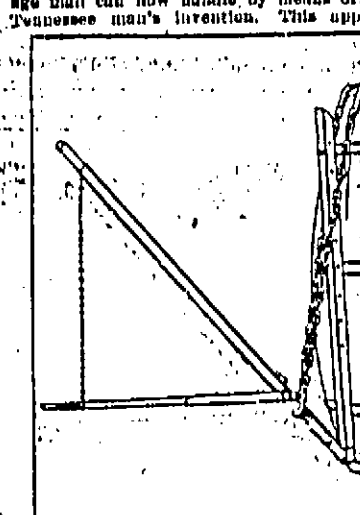

played like violin. The bridge of the violin is at the point of intersection of the horns, two diaphragms connect them. The lower end of the horns rests on a brass connecting the horns. The player can either use a bow, and play upon the instrument as he would upon a violin, or he can pick at the strings with his fingers, as in using a harp. In either case the sound thus produced is transmitted through the horns, making a peculiar, mellow tone, in which the vibrant note of the stringed instrument is audible. The best results can be obtained by using a bow and playing the instrument as a violin.

TO MOVE HEAVY OBJECTS

Apparatus Enables One Man to Handle a Heavy Hoghead.

Every once in a while somebody raises the question, Are men as strong as they were in days of old? It is pretty generally conceded that they are not, but that really makes little difference, for the heaviest knight of the Middle Ages would have a hard time manipulating the 1,000-pound hoghead that the average man can now handle by means of a Wisconsin man's invention. This apparatus

works on the principle of a lever and by means of a hinged lever, the short end of which is placed along the side of the hoghead, and a heavy weight which looks to the eye and gives a purchase thereon. By this means a hoghead of great weight can be lifted and moved about with comparative ease by a man who ordinarily would not be able to budge it. There is also a supplemental lever attached to the main lever.

SCIENCE NOTES

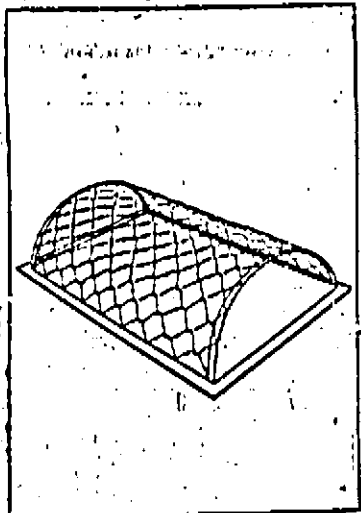

The matter of electric train lighting is being given a great deal of attention at the present time by railroad people. There are three systems and each has its adherents. The first is the "head on" system, in which the current is supplied from a dynamo on the engine or front end of the train, the necessary power being derived from the steam from the engine. The second is the side system by which the generators are driven by means of the power taken from the axle as the train progresses. The third is the storage system. Some figures relating to the head-on system were contained in a report recently made to the Association of Car Lighting Engineers, taken from a road operating last year over 7,500 miles of track, the cost, including interest on investment in generating apparatus, and batteries, depreciation on equipment, cost of fuel, labor, etc., would be \$400 per car per year, or \$1.50 per car day. The cost of operation of such a train lighting system, in use on the C. M. and St. Paul Railroad during the year ending October, 1908, shows that the average duration of life of system to supply 100 light bulbs \$1.25 per car day per car, there being 183 cars in service. The trouble was mainly due to defects in the steam supply system.

In the course of extensive improvement made in the Columbia River, it has been found advisable to erect a long jetty just opposite the point where the stream empties into the Pacific Ocean, and one of the great difficulties encountered in the maintenance of traffic work was the ravages of the tides, which is an active that often, at the end of a year's service, these pieces of wood are so perforated as to be absolutely useless for the purpose for which they were built. An entirely new method of building with this destructive force has been tried. The protective process consists of wrapping each pile over the portion likely to be in the water (approximately the middle third) with three thicknesses of tarpaulin, secured with the best Welsh oak or roots of birch being used between the layers. The tarpaulin is fastened on with staples. As at first used, this method was open to the serious objection that the tarpaulin of slown from the tides knocked off this protection in places, leaving openings for the entry of the tides. To prevent this, a number of longitudinal pieces of 2 by 4-inch timber are nailed on, placed at intervals around the circumference. The method of protection is considered as permanent as yet, but with very good prospects of success. More cutting of the piles without use of the birch would not do here, as it would be worn off by the continuous action of the waves.

FLYPAPER GUARD

Wire Screen Prevents Innocent Victims Sticking Feet.

Before its purpose is a great attention and help materially to make life more worth living in the summer, but sometimes the innocent suffer with the guilty. Who has not sat on a piece of flypaper and been bothered by a fly? The fly is in the net. To guard against this a new device has been brought out in a little device which should, especially be come popular. This device consists of a thin metal or wooden base to hold the

DANGEROUS TO PILES ONLY. sheet of paper and a curved wire cage arching above it. The cage has large openings, but not large enough to let a person's hand through. The cage is detachable and fits on the base through the engagement of strips of spring metal which run across its ends. At the same time it holds the paper in place and there is no danger of a dust of which taking up the sticky mass and while it is likely to fall side down or is found clinging tenaciously to some piece of furniture.

SHORT GLOVES FOR STREET.

The Smartest Colors Are Old Leather, Dark Tan and Gray.

Short gloves are to the fore for street wear, inasmuch as the long, close sleeve has rendered the long gloves unnecessary except for evening wear or other full dress. These walking gloves have one or two clasps, plique-sewn seams, and corded stitched backs. The colors most in evidence are old leather, dark tan and gray. Chambray gloves are out in an excellent new form for winter, and are much more satisfactory than formerly, as they can be washed very successfully. They are heavy enough for comfortable warmth, and have remarkable wearing qualities, which is an important item for consideration. For washing the gloves satisfactorily, care must be exercised in both washing and drying them. Use a wash of warm water and rub the chambray very gently; but in order to get the seams quite clean it may be necessary to use a brush, which should not be too stiff. Many women prefer not to rinse out quite all the soap as when left in the chambray is less apt to be stiff. Shake them well, and as they dry pull them into shape. The drying process is very, very slow, so they can be handled and pulled into shape from time to time, thereby having less chance to shrink and become misshapen.

White gloves are worn for evening and afternoon dress affairs. Once kid is considered more dressy at present, whether in black, tan or white, suede being more used for street wear than for dress.—From the Delineator.

Waste of Good Money. Think of a dinner costing \$25 a plate when a single cutlet is fattened into a 400-pound hog for Iowa!—Charleston News and Courier.

TODAY'S CHICAGO MARKETS.

[SPECIAL TO THE GAZETTE.]

Chicago, March 6.

Cattle receipts, 300. Market, steady. Hogs, 4,000. Texas steers, 4,000. Western steers, 4,000. Stockers and feeders, 2,000. Cows and heifers, 2,000. Calves, 6,000.

Hog receipts, 18,000. Market, mostly 5c higher. Light, 6.40@6.50. Mixed, 6.15@6.30. Heavy, 6.25@6.40. Rough, 6.25@6.35. Good to choice heavy, 6.35@6.60. Pigs, 5.25@6.00. Bulk of sales, 6.15@6.50.

Sheep receipts, 2,000. Market, steady. Native, 3.30@3.75. Western, 3.50@3.80. Yearling, 4.00@4.10. Lambs, 5.75@7.85. Western lambs, 6.75@7.90.

Wheat. May—Opening, 1.15 1/2@1.16 1/2; high, 1.16 1/2; low, 1.15 1/4; closing, 1.16 1/2. July—Opening, 1.03 1/2@1.04; high, 1.04 1/2; low, 1.03 1/4; closing, 1.04 1/2. Dec.—Opening, 97 1/2@97 3/4; high, 98; low, 97; closing, 98. Rye. Closing—80. May—82.

Barley. Closing—65 1/2. Corn. May—68 1/2@69. July—67 1/2@68. Sept.—67 1/2@68. Dec.—67 1/2@68. March—67 1/2@68.

Oats. May—59 1/2. July—59 1/2. Sept.—59 1/2. Dec.—59 1/2. March—59 1/2.

Poultry. Turkeys—17. Springers—15. Chickens—13 1/2.

Butter. Creamery—22 1/2. Dairy—20 1/2. Eggs. Eggs—10.

Live Stock. Omaha, Neb., Mar. 6. CATTLE—Market steady. Native steers, 11.00@11.50; cows and heifers, 10.00@10.50; western steers, 10.50@11.00; Texas steers, 10.00@10.50; range cows and heifers, 9.00@9.50; calves, 10.00@10.50; stockers and feeders, 10.00@10.50; calves, 10.00@10.50; and pigs, 10.00@10.50.

HOGS—Market steady. Yearlings, 10.00@10.50; mixed, 9.50@10.00; light, 9.00@9.50; dark, 8.50@9.00; bulk of sales, 9.00@9.50.

1909H—Market steady. Yearlings, 10.00@10.50; mixed, 9.50@10.00; light, 9.00@9.50; dark, 8.50@9.00; bulk of sales, 9.00@9.50.

1909H—Market steady. Yearlings, 10.00@10.50; mixed, 9.50@10.00; light, 9.00@9.50; dark, 8.50@9.00; bulk of sales, 9.00@9.50.

JANESVILLE MARKETS. Janesville, Wis., March 3.

Bar Corn—110@112. Corn Meal—11.00@11.50 per 100 lbs. Feed Corn and Oats—32.00. Standard Middlings—32.00@32.50. Oil Meal—17.50 to 18.50. Bran—22.00@22.50 per ton.

Oats—50@51.50. Yearling, 6.00@7.10. Lambs, 5.75@7.85. Western lambs, 6.75@7.90.

Butter and Eggs. Creamery Butter—23 1/2. Dairy Butter—22 1/2. Eggs, packed—18 1/2@20. Eggs, fresh—20 1/2@22.

Elgin, Ill., March 1.—Butter—Firm; 20c. Salmon for the week, 425,800 lbs.

CANNON FAVORS A CHANGE. Would Have the President's Inaugural on May 1.

Washington, Mar. 6.—Speaker Cannon has declared himself in favor of changing the date of the presidential inauguration from March 4 to May 1, and added that as one representative in congress he would lend his aid in any effort to bring this about.

"I witnessed the dreadful weather conditions that prevailed in 1872, when four or five hundred people caught their death," he said. "I recall the Harrison inauguration with the soaking chilling rain storm and the snow and icy gale that made life miserable at Cleveland's second inauguration. If the change of date is made, it might well be fixed later than April for even April rain would cause great discomfort, and much sickness, and I should think May 1 would provide more certainty of fair weather."

"Box" Teams Win First Games. San Francisco, Mar. 6.—Both of the Chicago White Sox teams won the first games of the season yesterday. Team No. 1 defeated the San Francisco nine, 5 to 2, and team No. 2 was victorious over the Los Angeles boys, 5 to 3. Scott, Sutor and Spencer pitched for the Chicagoans here. The Chicago battery at Los Angeles was Miller, Altrock, Armstrong and Shaw.

More "Dry" Victories in Indiana. Indianapolis, Ind., Mar. 6.—Whitley and Hancock counties voted "dry" yesterday. Twenty-four saloons were put out of business.

GOOD CLOTHES FOR MEN AND BOYS, AND NOTHING ELSE

Money cheerfully returned. All goods sold under the Ziegler guarantee.

WHAT ARE YOUR CHANCES?

Young men and young women of equal ability start out in life to win success. Some attain high positions, command high salaries and succeed in all they undertake. Others are complete failures. Why? Simply because of a different start. Those who achieve success have been trained to work intelligently and effectively. They have received the kind of training that enables them to do the work the business world wants done. Those who fail are the ones that lack that necessary training. They devote as much time to their duties and work as faithfully, yet they lack the qualification which is most essential to success—a plain, practical, working knowledge of business affairs. They are hampered by ignorance and unable to compete with those who have been trained to successfully fill their places.

Experience is a dear teacher and many young men and young women find out only too late that there is no place in business life for those who are not prepared to do the work required of them.

In this school many of your friends and acquaintances have been trained for the active duties of business life. They have been assisted to good positions and have been able to fill those positions acceptably. What we have done for others we can do for you. The demand for competent office help is constantly increasing and each succeeding year greater opportunities await those who are competent to do the work.

Students may enter this school at any time, there are no divisions and no vacations. The instruction given in all departments enables each student to progress as rapidly as his ability will permit.

Enter now and in a few months you will be prepared to secure and hold a position in the business world that will place you among those that win success.

HERE IS AN ILLUSTRATION

Three young ladies are determining upon some method of earning a living. The first becomes a saleslady in a store at a salary of \$4.00 per week, \$208.00 per year. She will very likely in time receive an increase in salary to perhaps \$8.00 per week—\$312.00 per year. The second lady decides to become a public school teacher. She spends two or three years at a Normal School under heavy expense, after which she teaches school, eight months in each year at a salary of \$40.00 per month—\$320.00 per year. At the end of five years the salary is the same. The third young lady decides upon a business career, attends a Business College, secures a stenographic training in six months time and accepts her first position at a salary of \$40.00 per month—\$480.00 per year. At the end of five years she has advanced to \$60.00 to \$75.00 per month—\$720.00 to \$900.00 per year.

PROVE IT BY YOUR ACQUAINTANCE

In your acquaintance are many young people who have followed the different courses, and have demonstrated the fairness of the calculations. The young lady who enters upon the commercial course is vastly more successful than those who enter upon any other vocation we have mentioned. In the business world, unlimited possibilities are presented to either young men or young women who are qualified to do satisfactorily the work the business world wants done. A course of training in this school prepares you to secure and hold a good position. Write for full particulars.

MONROE OFFICE IS TO BE TRANSFERRED

Wells-Fargo Company Takes Charge of the United States Express Co.'s Business May 1.
(SPECIAL TO THE GAZETTE.)

Monroe, Wis., March 6.—G. K. Hunter, route agent of the Wells-Fargo Express company, was in the city with Route Agent H. M. Tudor, of the United States Express company, and arranged for the transfer of the office here to the Wells-Fargo company on May 1st. Arthur Hughes, who has represented the U. S. company, has been appointed agent of the Wells-Fargo company, which will take the U. S. property and occupy the same office.

Miss Eva M. Hughes died of blood poisoning at the home of her parents, Mr. and Mrs. H. D. Hughes, West Payne street. She was born in Danville, Ill., December 9, 1890. She came here, just full and was employed as a dining room girl in a local hotel. The family formerly resided at Deloit. The body was taken to Durand for burial today.

Ten shares of stock in the First National bank of this city were sold to Dr. W. H. Caradine, who was the highest bidder, at \$350 a share. The stock was sold by Jacob Bankert and Mrs. E. S. Abbott. Some time ago five shares of the stock sold at \$401 a share.

The Cardinal basketball team, of this city, was defeated by the Normal at Platteville last night by a score of 44 to 24.

Two basketball teams of the Monroe high school, the girls and the boys, were defeated at Albany last night. The boys' game resulted in a score of 41 to 13 in favor of Albany, and the girls' game 13 to 5 in favor of Albany.

Mr. and Mrs. J. B. Crow and son, who have been spending the winter with Mr. and Mrs. F. H. Smock at San Diego, Cal., are on their way home, coming via Seattle.

Edward Carroll and Henry Carroll left last evening for Farley, Iowa, to attend the funeral of their brother-in-law, Sheriff H. L. Ball.

H. N. B. Caradine was at Madison yesterday.

Mr. and Mrs. J. B. Trent spent yesterday at Madison.

Mr. and Mrs. L. G. Trent are visiting friends at Proport.

Mrs. Jacob Karlon, Jr., is home from a visit at Madison.

Sam Millman, who has been spending some months here, left for Amsterdam, N. Y., where he is employed.

Wm. Flanagan and Miss Nellie Flanagan have returned from Rochester, Minn.

Link and Pin

THE LABOR LEADER AND HIS HOME.

Samuel Gompers dominates his home and they like him and love him for it. In fact, he dominates about everything and everybody with whom

PLACING DOCUMENTS IN A ZINC BOX PREPARATORY TO LAYING THE CORNERSTONE OF THE LINCOLN MEMORIAL AT THE LINCOLN FARM IN KENTUCKY.

1. President Roosevelt, who delivered a brief address and assisted in laying the cornerstone; 2. Governor Folk of Missouri, president of the Lincoln Memorial association; 3. R. L. Jones, secretary of the association.

GEORGE MEMSIC.

It is peculiar how some fighters, even if only third raters, manage to get into the "George Mensic" is a good illustration. He has been whipped repeatedly and having his bout with Gans, never made any remarkable showing unless it was against Charley Sney. Yet George gets matches and gets the money. His latest is a bout with Frank Pleator, which is

he comes in contract. His home is a three-story brick, is located at 2122 First street, N. W., Washington, D. C., in a neighbor hood unpretentious but comfortable. The household that makes and keeps it going for him includes the wife of his youth, an unmarried daughter, and, practically, a married son who lives nearby and spends much time in his father's home—and the latter's daughter Florence, the apple of her grand father's eye.

The most pronounced taste of the women of his family is a love for music, but their one object in life is to cater to the great labor leader, to make home a haven of rest where he may bring his work and his worries if he must, but where at least no fresh anxieties await him. His young granddaughter, for instance, has studied photography and typewriting solely that she may help him with some of the vast amount of work he brings home and which frequently keeps him in the solitude of his den on the third floor of his home until 2 or 3 o'clock in the morning.

Mrs. Gompers, whom he married when they were both so young that he "cannot remember when they were not married," has been his helpmeet in every sense of the word—the mother of a large family, and her husband's constant companion. Intelligently sympathetic in his lifelong warfare in the half of organized labor.

PHILADELPHIA JACK O'BRIEN.

EDGERTON SCHOOL DEDICATED FRIDAY

Dedication Exercises Held in the New \$50,000 High Yesterday Afternoon and Evening.
(SPECIAL TO THE GAZETTE.)

Edgerton, Wis., March 6.—The dedication of the new Child High school building was held yesterday afternoon and last evening, the same program being carried out at both meetings.

The afternoon meeting was for the pupils and the evening devoted to the parents and friends.

A very interesting address, his subject being "The Last Chord," L. E. Gottleb gave an excellent address on "The School From a Citizen's Standpoint." Prof. O. J. Schuster of Platteville gave the dedicatory address. His subject was "The Progressive Spirit and High Ideals in Education. The assembly and adjoining rooms were united to their utmost capacity.

Child is most generous in her gifts along educational lines, having recently given Appleton university \$25,000.

Mrs. Emma Hendrick spent Friday in Edgerton with Mr. and Mrs. Ben Compton. Mr. Compton is in very poor health at the present writing.

A very pleasant surprise party was carried out by thirty of the R. N. A. ladies, who took possession of Mrs. Ethel Staraden's home Thursday afternoon and informed her they had come to help her celebrate her birthday. They brought their supper with them and the afternoon was pleasantly spent with cards and lunch. At

5:30 a delicious supper was served after which the guests departed while the Nightriders many happy returns of the day. They left as a pleasant reminder of the occasion a handsome hand-painted set of suit and pepper dishes.

The Ladies' Missionary society of the Congregational church held its annual monthly meeting at the home of Mrs. J. W. Conn. A very interesting program was given. At its close light refreshments were served, and a neat little sum added to the treasury.

Mrs. Perry Neatherwood of Oregon is a guest at the home of Dr. and Mrs. Harry Keenan.

Mrs. Chas. Spencer and daughter came up this morning for an over-Sunday visit with John Spencer and family.

Jacob Dady spent Friday in Madison.

What Western city?

Monuments

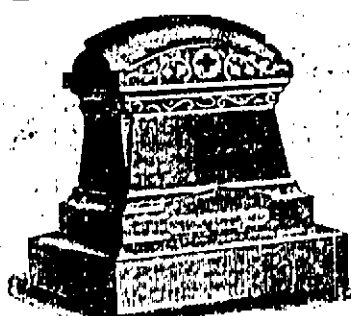

Before you get ready to buy, we invite you to visit our shop and see the excellent stock we have on exhibition.

We give careful attention to every detail of the business, and it is all done in the most reliable manner possible.

The samples on our floor now and at the prices we can offer them will convince you that by our method of buying direct from manufacturers that our prices are exceptionally low for the highest grade of stone.

The lettering and the design for the work we say without hesitation will be a work of art, and will be a work that is lasting and worthy of its purpose.

OBERREICH & SANDEWAY
110 NORTH FIRST STREET.

THE HEAVENS IN MARCH.

By Professor Eric Doolittle of the University of Pennsylvania.

Photograph of the new comet. The Zodiacal light. Neptune and Uranus.

The beautiful planet Saturn, which with its rings and numerous moons is always a most interesting object in the sky, is rapidly leaving the evening telescope, and will be seen only in the early morning hours. During the first week in March it may be seen setting exactly at the west point of the horizon, at about 7 o'clock, but the sun is steadily drawing nearer the planet, and on April 2 will pass in the east of it from this time on, until next autumn, Saturn will be a morning star.

The far more brilliant Jupiter is high up in the south-east, in the most favorable position of the entire year for observation. It reached its point of greatest distance from the earth at 2 P. M. on February 28, and during the next few weeks will be seen at its greatest distance from the earth. The planet is steadily drawing nearer the earth, and on April 2 will pass in the east of it from this time on, until next autumn, Saturn will be a morning star.

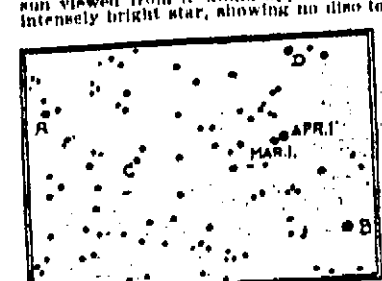

Fig. 2. The square of Fig. 1 enlarged to show the position of Venus.

the eye. Our own world and the three other planets nearest the sun would be so minute and so lost in the sun's rays as to be hopelessly invisible.

Two-thirds as far away as Neptune the sun is its sister planet, Uranus. The sun is 93,000,000 miles from the earth, each very much less dense than the earth, and both of them probably still very hot and in a vaporized condition. As Uranus is so much nearer to the sun it appears much brighter, and is clearly visible to the eye under favorable conditions as a greenish star.

Throughout the month, Uranus is near the planet Mars, which is seen near the sun in the southeast for two or three hours before sunrise. It will be most easily found in the morning of the 20th or 21st, for in the afternoon of March 20 Mars, in its westward motion, will pass exactly below Uranus, the outer planet, at which time they will be seen

at a distance only very slightly greater than half the apparent diameter of the moon.

THE TRANS-NEPTUNIAN PLANET, though Neptune is so enormously distant from the sun that it requires 112

years to pass once around its orbit, it has many times been suspected that there may be one or even more great worlds so far away that their years are longer than those of the planet Uranus. It is well known that when a comet passes near a planet the pull of the

planet's orbit will be near the orbit of the disturbing planet. Thus, in March 3, the path of the comet will be near the path of the planet Jupiter. The points marked B are those in which the comet passes through the plane of Jupiter's orbit, and it will be noticed that the paths of the comet and of Jupiter are very close together. There are 30 comets connected with Jupiter in this way, two with Saturn, three with Uranus, six with Neptune, and a few

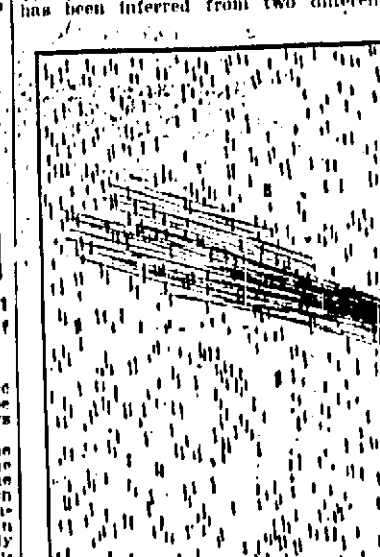

Fig. 3. Paths of comets which pass near the planet.

an immense swarm of small particles, there are few of them which are dark enough to be seen by the light of the sun. Another most interesting result is that though great clouds of radiant matter are driven off from the head of the comet, their motion was very probably not due to light pressure, as has been quite generally believed, because their velocity did not increase as they receded, but actually decreased to slightly diminish. It seems probable that the wonderful repulsive forces whose action forms the tails of comets are electrical in character.

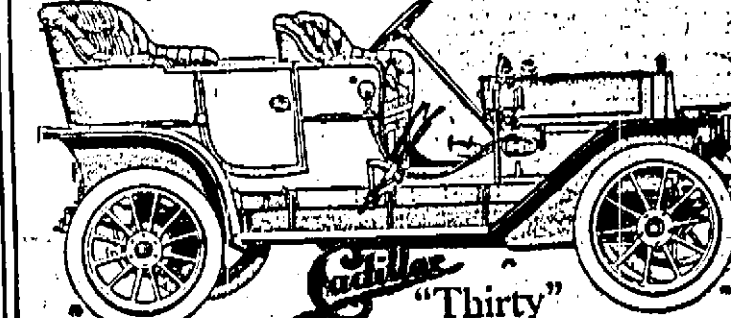

THE ZODIACAL LIGHT.
This is the best time of the year for observing that faint, mysterious pyramid of light, which extends upward from the Western horizon after the sun has fully set. It cannot be seen except when the sky is very clear and the moon absent; the observer should therefore look for it during the second and third weeks of the month. It is probable that this light is sunlight reflected from a great unshaped swarm of little particles which surround the sun and extend beyond the orbit of the earth, but there are also several other theories in regard to it.

PARK HOTEL GARAGE

PLEASING TO THE TASTE—
GEORGE'S PEANUT BRITTLE, 15c lb.
FRANK GEORGE, 211 W. Milwaukee St.

THE HEAVENS IN MARCH.

By Professor Eric Doolittle of the University of Pennsylvania.

Photograph of the new comet. The Zodiacal light. Neptune and Uranus.

others whose greatest distance from the sun is about twice that of Neptune. It is these last which are assumed to have been distributed by a hitherto undiscovered planet.

If a new planet exists, its pull must slightly disturb the motions of Neptune and Uranus. About 50 years ago evidence of such a disturbance was suspected with the former planet, and the new body was carefully searched for with the great telescopes at Washington. We cannot be certain that such a disturbance exists until the pull of each of the known planets of the solar system has been determined and allowed for; when this has been done the prediction of the position of the disturbing body among the stars is a comparatively simple matter. If it exists, which is as yet by no means certain, it will probably be discovered by photography. It has been suggested that this far-distant world, revolving slowly and majestically around the sun, should be named Chronos, the time-keeper.

THE NEW COMET.
Of this body hundreds of photographs have been secured, showing an almost continuous history of its wonderful changes in form and structure. It is hoped that when these have been carefully studied our knowledge of the nature of comets will be greatly advanced. Already it is realized that this comet shows principally by its own light, although doubtless composed of

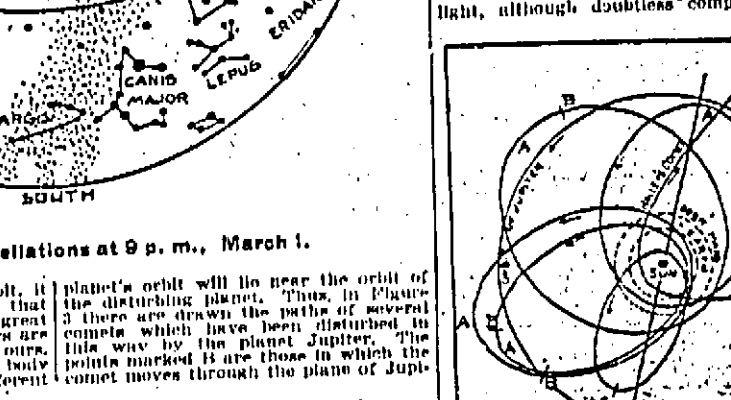

Fig. 3. Paths of comets which pass near the planet.

an immense swarm of small particles, there are few of them which are dark enough to be seen by the light of the sun. Another most interesting result is that though great clouds of radiant matter are driven off from the head of the comet, their motion was very probably not due to light pressure, as has been quite generally believed, because their velocity did not increase as they receded, but actually decreased to slightly diminish. It seems probable that the wonderful repulsive forces whose action forms the tails of comets are electrical in character.

THE ZODIACAL LIGHT.
This is the best time of the year for observing that faint, mysterious pyramid of light, which extends upward from the Western horizon after the sun has fully set. It cannot be seen except when the sky is very clear and the moon absent; the observer should therefore look for it during the second and third weeks of the month. It is probable that this light is sunlight reflected from a great unshaped swarm of little particles which surround the sun and extend beyond the orbit of the earth, but there are also several other theories in regard to it.

facts, of which the first is the position of the paths of certain comets, and the second is a possible disturbance of the motion of the planet Uranus. It is well known that when a comet passes near a planet the pull of the

planet's orbit will be near the orbit of the disturbing planet. Thus, in March 3, the path of the comet will be near the path of the planet Jupiter. The points marked B are those in which the comet passes through the plane of Jupiter's orbit, and it will be noticed that the paths of the comet and of Jupiter are very close together. There are 30 comets connected with Jupiter in this way, two with Saturn, three with Uranus, six with Neptune, and a few

EAST STILL IN GRASP OF BIG SNOWSTORM

Estimated Damage to Telegraph Wires
and Railroads is \$500,000—
Trains Delayed.

Baltimore, Md., Mar. 6.—Practically isolated from the outside world, save by flickering wireless communication and belated trains, Baltimore is making every effort to bring order out of chaos.

The storm that brought havoc in its wake gave place to clear skies and cool, bracing air.

Hundreds of telegraph and telephone wires not only in the city, but for a long distance in many directions, lay on the ground, trains ran in and out of the city without orders, and city traffic was generally impeded. Gangs of workmen throughout the storm area worked all day in an effort to secure temporary service.

For from 30 to 40 miles in all directions, poles and wires lay in a mass of tangled wreckage. Miles of poles and wires will have to be built entirely.

It is estimated that at least 100 miles of electric wires lie prostrate within the limits of the city as a result of the storm and more than 500 poles are down.

The monetary loss is estimated at \$500,000, not including the loss of receipts to telephone, telegraph, electric power companies and railroads, the latter being placed at figures fully as high as those of the former. The bulk of the loss falls upon the railroads.

New York, Mar. 6.—Train service between this city and Washington was still badly tied up last night. Little parties of those who went from this city to attend the inauguration ceremonies, struggled in with all sorts of stories of hardships. Traffic out of Washington, they reported, was seriously muddled, and there was little hope of relief for 24 hours or more.

ADMITS HE MURDERED MOTHER.

Mystery at Baugotuck, Mich., Explained by Son's Confession.

Holland, Mich., Mar. 6.—Edwin Baldwin confessed yesterday to the prosecuting attorney that he killed his aged mother who was found dead yesterday in her farmhouse two miles from Baugotuck. He said that he was afraid she would charge him with having burned their barn, and therefore killed her with a hatchet while she was asleep.

Baldwin was later taken to Allegan and arraigned in the circuit court on a charge of murder. He pleaded guilty.

Wins Iowa Oratorical Contest. Sioux City, Ia., Mar. 6.—Fred W. Tachonmeyer of Morning Star college won first place in the state oratorical contest last night. Second place went to S. W. Allen of Ames, and third to Charles O. Purdy of Drake. Nearly 2,000 persons heard the orations.

GIRLS HURT IN SCHOOL PANIC.

Fire Nearly Causes Rush in Which Six Pupils Are Hurt.

Buffalo, N. Y., Mar. 6.—Six young girls were severely bruised in a panic at St. Stanislaus parochial school on Fillmore avenue yesterday afternoon. It was only a few minutes before the regular time for dismissing the girls when a fire engine came clanging down the street. The fire was in a house adjoining the school. The sound of the apparatus stopping so near by caused nervousness among the girls, and when one of them screamed "Fire" a wild stampede ensued. The teachers did their utmost to check the rush, but they were swept aside and in a few seconds the stairways were jammed with a mob of four-hundred girls. When the stairway opened it was found that six of the girls were unconscious. They were revived.

PROPERTY IN CHICAGO.

Heirs of Original Owner Declare Realty Is Wrongfully Held.

Deloit, Wis., Mar. 6.—At a family reunion of the heirs of Andrew Layton, a pioneer settler of Chicago, legal measures were planned to get possession of 80 acres just south of the Cook county courthouse in Chicago.

It is asserted that the tract was never sold by Layton and that the present occupants are trespassers. Mr. Layton died many years ago, after giving a daughter a deed to the property. The heirs are W. D. Layton, Plattsmouth, Neb.; L. E. Layton and Mary A. Devoux, Deloit, O. W. Layton, Lake Geneva, and Mrs. L. F. Ames, Monroe, Wis.

"Cyclone" Wins His Fight.

New York, Mar. 6.—"Cyclone" Johnny Thompson of Sycamore, Ill., defeated Mike Gannon of Pittsburgh in a ten-round bout at the National Athletic club last night. Thompson had the best of the fighting from the start, knocking his exhausted rival down at the end of the tenth round. The bell rang in time to save Gannon from a probable knockout.

New Orleans, Mar. 6.—Freddie Welsh of England knocked out Ray Morrison of Indianapolis, Ind., in the thirteenth round of what was to be a 20-round bout before the West Side Athletic club here last night.

Doctor Held After Inquest.

Wabash, Ind., Mar. 6.—Following an inquest held by Coroner Dennis over the body of Mrs. Shewly, wife of Dr. George E. Shewly of Roann, Dr. Shewly was arrested and charged with causing her death by strychnine poisoning, hypodermically administered. Mrs. Shewly died February 3.

Wisdom of the Mouse.

Consider the little mouse, how sagacious an animal it is which never intrusts its life to one hole only.—Plautus.

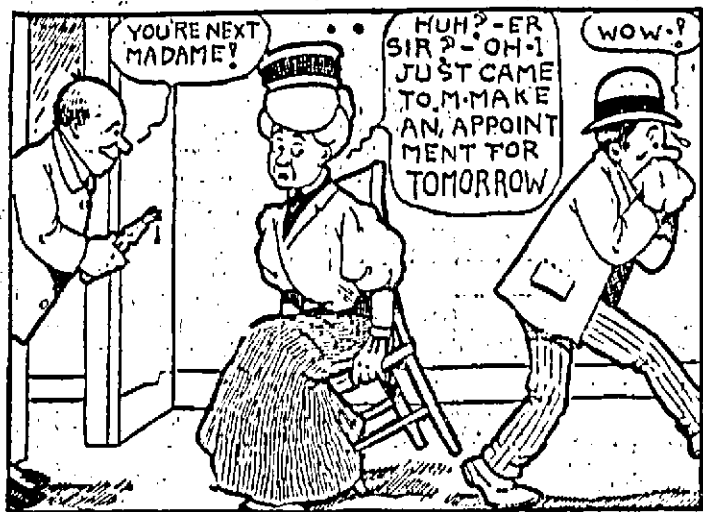

MISS MAE DONNELLY, CHICAGO HEROINE, WHO NEARLY LOST HER LIFE IN SAVING LIVES AND PROPERTY.

Chicago, Ill.—In a recent fire in which two lives were lost and over half a million dollars worth of property destroyed, one young girl of 17 years, who was at the telephone switchboard, is hailed as the heroine and is to be thanked for saving the lives of many and thousands of dollars worth of property. Miss Mae

Donnelly remained at her lonely post of duty while the others fled to safety, telephoning the fire department and notifying employees and owners of the fire, until she fell over unconscious from suffocation. She was later rescued by the firemen and revived.

A TRIP TO THE DENTIST'S

When the Telephone Patent Expired

there were only some 400,000 telephones in use in the whole United States, although the Bell company had been in operation some 20 years. Today there are over seven million telephones in use and by far THE GREATER NUMBER ARE OWNED BY INDEPENDENT COMPANIES. This shows what competition and fair rates have done for the people in ten years.

You can have a residence phone in your home for \$1.00 per month.

"Buy it in Janesville" and get double the service for the same money.

W. H. ASHCRAFT

Furniture and Undertaking

104 West Milwaukee St.

PORTLAND CEMENT CHICAGO "AA"

has been a leader for 14 years. The reason for this is the extreme fineness to which the cement is ground. It is nearly 100% fine. The finer your cement the more economical it is, because it binds more sand and makes more and better concrete. It develops more strength per sq. in. when hard set because it is free from coarse particles which cost at the cement rate, but bind no better than sand. Take a sample of "CHICAGO AA" going into work anywhere and test it yourself. We guarantee "CHICAGO AA" to be absolutely uniform in color, fineness, soundness and sand carrying capacity. Accept no substitutes, get the genuine "CHICAGO AA." We are sole local agents for this cement.

This Beautiful Hoosier Kitchen Cabinet

A pantry, cupboard, work table combined. It saves miles of walk for the housewife. It is the most complete and convenient kitchen affair made.

It has labor features, a special convenience of arrangements—commodious cupboards and drawers, a sanitary flour bin with sifter bottom, a dust proof sugar bin, air and many other convenient extension table top, bread box tight spice cans, aluminum.

Any woman can own this cabinet. Pay \$3.00 when delivered and \$1.00 per week for 22 weeks.

Ask your friends who own one and they will tell you they could not get along without this modern convenience in their kitchen.

FRANK D. KIMBALL

FURNITURE - - UNDERTAKING

PROSPERITY

The emblem of prosperity is light. Everybody likes to trade at the best lighted store. Who ever saw a dark, gloomy store busy?

The Tungsten lamp is the king of gloom dispellers. Its bright, white light on a small amount of current is the secret of its success. Throughout its long life its candle-power never decreases as will that of the new Reflex gas cluster. Actual experience shows that these gas clusters lose nearly fifty per cent of their initial candle-power after a few months' use. You burn the same amount of gas however, don't imagine that your consumption decreases with your candle-power. The Tungsten lamp gives full candle-power for current consumed.

A four light Tungsten cluster can be operated for 1.4 to 2 cents per hour, according to the length of time used

Comparison right here in the stores of this city show their vast superiority and economic value over the Reflex gas cluster.

We can show you merchants who have tried both; their praises for the Tungsten are our best argument. If you are skeptical let us place a cluster on trial. You too would then know that the Tungsten is the most economical, adaptable, and efficient light on the market.

We bid for your patronage with the express understanding that we make good.

A solicitor is always at your service.

ON THE BRIDGE

MAGAZINE REVIEWS

The leading place in the Engineering Magazine for March is given to the introductory article of a series by Charles Huxton Goring on the "operating methods of the Santa Fe railway." The Santa Fe has developed shop methods, mechanical and manufacturing practice and relations with employees which are in advance of any of the standards reached even under conditions of keen competition in manufacturing. Mr. Goring's profusely illustrated article will describe in detail the chief of these features.

Another illustrated feature of much interest is "Edgar Allen Forbes" description of the railways of French North Africa and the conditions of travel in Algeria, Tunis and Morocco. A discussion of the engineering situation in the United States may be of peculiarly timely interest at the present time. Arthur Selwyn Brown contributes a review of production and prospects in the copper industry. A simple cost-finding system for complex situations is described and illustrated by John Sturges. The second and concluding installment of O. M. Becker's series on the nature and characteristics of the new metals deals with the effect on structure and properties of the various metals used as hardening agents. C. E. Knapp presents the sixth article of his series on systematic foundry operation and foundry costing, and Harrington Emerson brings to a close his long series on efficiency as a basis for operation and management. The number also carries the full review of the Engineering Press and the Engineering Index.

Is There a Limit?
The dictation of labor unions is discussed in the March Atlantic by J. O. Fagan, himself a union man. He says that some unions go the adjustment committee of one of the largest unions of railroad employees paid an official visit to a railroad manager, and said to him in substance: "For the future we desire to establish the rule that no employee in our department shall be permitted to consult or confer with a superintendent on matters relating to his work except through the medium of the adjustment committee."

Old Love or New?
(Joannette Marks in "Success Magazine.")
This tapestry cloth over weave old love
To life again; those colors gild the days
That died so long ago; those fair de lights
Of chivalry and virgin, courtly ways
Still lie between the covers of a book,
Where, on the ivory page, all velvet bound,
Deep yellow with the dust of years, I look
To find the record of the Table Round.
Again I see the ladies flash the armor gleam,
The horses with their trappings shining gold;
Again in some pavilion do I dream
Of array and by shield the days of old,
Ah, from these knightly pages, worn and few,
Might I but tell again old love or new!

A Valuable Automobile Hint
If you wish to cut down your expense for automobile tire repairs, take an old casing, one that you have discarded, and cut it straight across into pieces from ten inches to two feet in length, separate the rubber from the canvas by simply stripping it off, and place two or three of these in your repair kit. Then when you have the misfortune to have a blow-out remove the shoe and simply place the tube and tire, taking pains to see that the clincher on the patch comes up well under the clincher on the shoe, and your tire is nearly as good as before. I ran one of these shoes thus treated over 2,000 miles this past season without even renewing the patch. Having two or three of these patches in your repair kit does away with the necessity of carrying an extra shoe, unless you are making long tours.—March Recreation.

Lenten Sacrifices
Father's gave up billiards (Since he landed his wrist),
Mother's gave up dancing,
Folk's with an bad habits (Still) may have some hope,
They can get in line like me,
I have gave up soap.
—North Youngs in the Circle Magazine for March.

Of special picturesqueness is Mr. French Brother's account of "Three Days with John Muir." Mr. Strother visited the great explorer and naturalist in his home in the Algonquin valley, California, and taking with him about many things. He offers the readers of the World's Work many luminous fragments of conversation with the "Sage of the Sierra."

Pipe buildings, apparatus, methods, psychological subtleties high as Pellon on Osha and there will result no better education than was given in the ancient district school unless behind this complexity of educational machinery are real teachers knowing how to teach and with time to do (true, individual teaching. The more we elaborate education, the more time we spend on pedagogical minutiae, the more we load ourselves down with apparatus, the more plainly it appears that the sole essential for real

education is the educated teacher who knows how to teach. Upon his, or her, personal fitness, rests the future of the country; with him, or with her, not in systems and apparatus, but the solution of this vexed question of the public school. The regeneration of mankind will be brought about, so far as the common school can effect it, by the direct, human influence of the individual teacher upon the individual pupil.—James P. Munroe, in The Popular Science Monthly.

A Cabinet of Lawyers.
The one striking thing about Mr. Taft's cabinet selections, considered as a whole, is the eminent lawyer's preference for able men of his own profession. Mr. Knox was never a politician, and entered the McKinley cabinet purely upon his reputation as a strong lawyer. Judge Van Devanter, Judge Dickinson, Mr. Wickersham, Mr. Ballinger, and Mr. Nagel, have all made their careers as lawyers, rather than as business men or politicians or officeholders. They are all men of the highest standing in their profession. Those of them who have not served as presidents of the American Bar association would be regarded by their fellow lawyers as well qualified for that honor. Even Mr. Hitchcock has been admitted to the bar. He has not, however, practiced law, and has made his way in the public service and in political life. The only two members of the new cabinet who are now lawyers are the holdovers from the present cabinet, Mr. Wilson and Mr. Meyer, both of whom are highly trained public men of long experience in legislative and executive work. With the personality of the new cabinet, the country is not as to the tried efficiency of each of its members. But there can be no doubt as to the tried efficiency of each individual unit in the group, and the country will soon learn the personal traits of these much-respected and exceedingly capable members of the learned profession of the law. These men are of a high quality of patriotism and public spirit, and they will serve Uncle Sam as faithfully as they have ever in the practice of their profession served the interests of any private client. Mr. Taft has many and serious problems before him, and it evidently suits him to have in heads of departments men possessing great legal knowledge and experience, who are also capable in matters of business. A high standard has been set by the Roosevelt cabinet, and the way has been blazed in many directions. The new department heads cannot easily excel their predecessors.—From "The Progress of the World" in the American Review of Reviews for March.

He Wants a Job.
PRIVATE SECRETARY.—A man of experience in commercial and literary fields, desiring to find an episode of development to an epoch of leisure, would serve for nominal compensation. Highest references.—"Situation Wanted," in New York newspaper. "Episode of development to an epoch of leisure." That's from Boston; no doubt about it. But "nominal compensation" has a little behind the rest. What the gentleman really meant to say was "honorary" of indeterminate amplitude.—Freeman Hilden in Van Norden—"The World Mirror" for March.

Where Was the Deacon?
Deacon Jones, the great man of a little village of Massachusetts, whose outward piety was of the vicerious order, but whose charity toward his fellow men was not as abundant as it might have been, was dangerously ill, and his brother deacons, impressed with the custom of issuing bulletins from the sick rooms of prominent individuals, decided to follow the fashion, with the following results:
"At 6 p. m. Deacon Jones is in a serious condition."
"7:00 p. m. Deacon Jones has rallied slightly."
"9:00 p. m. Deacon Jones has suffered a relapse."
"11:00 p. m. Deacon Jones has departed for heaven."
Thus the bulletins read at midnight; but early in the morning some unregenerate mortal who did not love the deacon, obviously passed that way for the light of a new day showed curious townspeople the later report:
"Heaven, 7:00 a. m. Great consternation here. Deacon Jones has not arrived."—Woman's Home Companion for March.

The March American Magazine.
In the March American Magazine, Samuel Hopkins Adams relates the adventures of a nonambulist. It is the true story of a man with whom Mr. Adams roomed while in college. It is doubtful whether a more extraordinary case of this kind was ever recorded.

In the same number Ida M. Tarbell, writing under the title "Where Every Penny Counts," shows how the tariff operates to increase the cost of living. Irving Mitchell presents a new line of new and interesting facts about Commodore Vanderbilt. Edwin Lefevre writes an imaginary conversation about Roosevelt, in which a railroad magnate, a great nerve specialist, and a famous novelist give their ideas of the man.

George Fitch, the new humorist, writes on Taft, William Allen White continues his series, Ingraham Lovell proceeds with his serial story. Other story writers are: Mrs. L. H. Harris, James H. Connolly, Octavia Roberts, and James Oppenheim.

"The Interpreter's House" and "The Merchant's Scrip" are full of good reading.

Woman's Power Over Man

Woman's most glorious endowment is the power to awaken and hold the pure and honest love of a worthy man. When she loses it and still loves on, no one in the wide world can know the heart agony she endures. The woman who suffers from weakness and derangement of her special womanly organism soon loses the power to sway the heart of a man. Her general health suffers and she loses her good looks, her attractiveness, her amiability and her power and prestige as a woman. Dr. R. V. Pierce, of Buffalo, N. Y., with the assistance of his staff of able physicians, has prescribed for and cured many thousands of women. He has devised a successful remedy for women's ailments. It is known as Dr. Pierce's Favorite Prescription. It is positive specific for the weaknesses and disorders peculiar to women. It purifies, regulates, strengthens and heals. Medicine dealers sell it. No honest dealer will advise you to accept a substitute in order to make a little larger profit.

IT MAKES WEAK WOMEN STRONG. SICK WOMEN WELL.
Dr. Pierce's Pleasant Pellets regulate and strengthen Stomach, Liver and Bowels.

MINERS IN MEETING PREPARE FOR BATTLE

Will Meet Anthracite Operators Next Week—Important Matters Discussed, Says Lewis.

Wilkesbarre, Pa., Mar. 6.—President Lewis of the United Mine Workers of America conferred yesterday with 50 members of the organization over the conference to be held with the anthracite operators next week. Following the meeting Lewis said:

"The meeting of three district boards was to consider the prospective conference with the anthracite operators. Many matters in this conference, like others, will not be given to the public, not because we would not like to take them fully into our confidence at this time, but for the reason that we believe it would be an unwise business method to divulge negotiations which are pending and which will affect vitally so many people as well as varied interests."

"The conference between the anthracite operators and the United Mine Workers' representatives will be held at the Reading Terminal building beginning Thursday, March 11, at 11 o'clock a. m. This is contingent only on the possible postponement to a later date of a few days on account of the pressing nature of the business of interested parties. The members of the three anthracite district executive boards and the three international board members of the anthracite districts with such other representatives as we may select will go to Philadelphia to attend this conference."

Mr. Lewis made a statement which would seem to indicate that there are possibilities of a suspension of operations in case the negotiations for a new contract extend later than March 31.

Mr. Lewis says that while in Philadelphia he met President Harter of the Philadelphia & Reading Company, President Moore Williams of the Susquehanna Coal Company, representing the Pennsylvania railroad coal interests, and W. A. Lathrop, president of the Lehigh Coal & Navigation Company. In New York he met President Truesdale of the Delaware, Lackawanna & Western Company; President Lore of the Delaware & Hudson Company, and President Thomas of the Lehigh Valley railroad. With them he arranged a conference for next Thursday.

INDIANA MAN IS MISSING.

Valparaiso Merchant's Wife Fears He Was Slain in Chicago.

Chicago, Mar. 6.—Lillian McDermott, 24 years old, Albany avenue, was taken into custody by detectives of the Central police station yesterday in connection with the mysterious disappearance of George La Force, 35 years old, a wealthy shoe merchant, who has been missing from his home in Valparaiso, Ind. The girl was later released on bond.

La Force came to Chicago three weeks ago with a large amount of money in his possession to put through a business deal. His wife declared that she has not heard from him since he left home.

According to Capt. O'Brien, a check for \$20, bearing La Force's signature, was found in her possession when the prisoner's garments were searched at the police station. The police official said Miss McDermott admitted to him that she had met La Force.

POLICEMAN KILLS CAPTAIN.

Washington Officer Victim of Mysterious Act by a Patrolman.

Washington, Mar. 6.—Capt. W. H. Matthews, of the Fifth police precinct in this city, was shot and killed while sitting at his desk in the station house last night by Policeman Collier. Without the slightest warning Collier entered the station and went immediately into the captain's office, where he jerked from his pocket a revolver and began firing bullets into Matthews's body.

Collier, it is alleged, had been reprimanded by Capt. Matthews for a breach of the rules and this at the time angered him. The police say they knew of no other reason for Collier's action last night. The prisoner refused to say anything about the shooting.

Follows Sweetheart to Grave.

Boston, Ill., Mar. 6.—An sequel to the suicide of Miss Dyl Somers, near here three days ago, John Nichols, 25 years old, killed himself yesterday by shooting, as did Miss Somers. He left a note saying he had nothing more to live for since his sweetheart's death. Nichols ended his life within sight of the girl's home.

Slays Wife, Commits Suicide.

Springfield, Ill., Mar. 6.—Henry Green, aged 25, a blacksmith of Hillsboro, yesterday murdered his wife and committed suicide. The double tragedy occurred at Pawnee, this county, at the home of Mrs. Green's father, George Miller, where Green had called to see about the withdrawal of a divorce filed in this city.

Two Children Burned to Death.

Hastings, Minn., Mar. 6.—Escaping coal gas ignited when the stove pipe accidentally broke apart, burned the house of Louis Hastings here Wednesday and with it his two-year-old daughter and four-month-old boy. A six-year-old boy escaped.

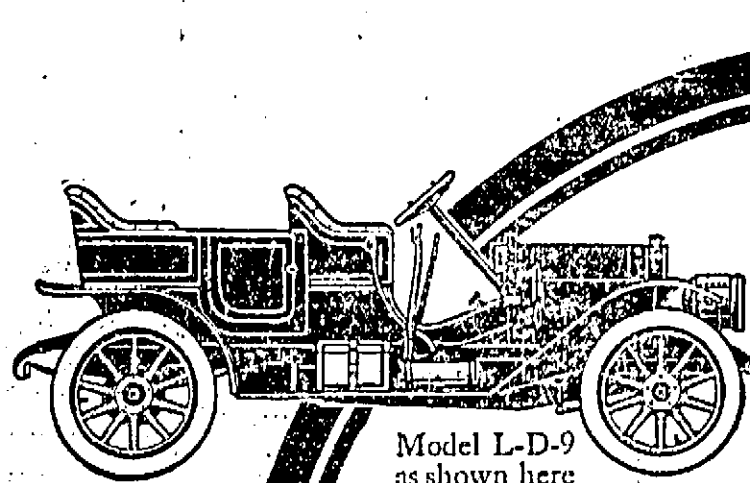

Blows Himself to Atoms.

Cleveland, Tenn., Mar. 6.—David Coffman, aged 60 years, purchased a stick of dynamite yesterday, attached a fuse to it, lighted it and lay down on the dynamite. The remains will be buried tomorrow.

Extravagance and Crime.

To be extravagant at the expense of other people is criminal.—Florida Times-Union.

WILLIE'S PETS

THEY CERTAINLY KEEP MOTHER IN HOT WATER

QUEEN OF THE WAR.
That's—am glad to hear Jones is on his feet again. What is he doing?
Father—He's back on the bleeding railroad.

FATHERLY ADVICE.
Father—My boy, never ask for credit.
Son—No?
Father—No, put up a pointer-pigeon front and let 'em force it on you.

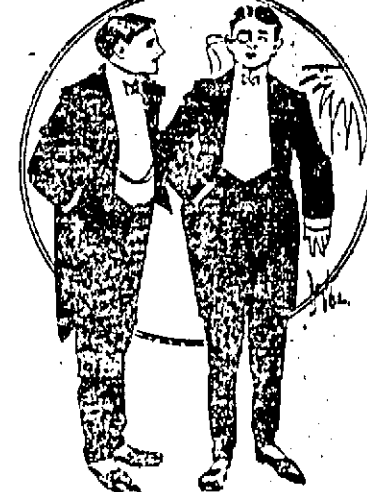

YOU CAN BET.
"Yes—Girls will be girls.
Nix—Yes, and old women will be girls.
You believe what they tell you about their ages."

HULK ENOUGH.
Kind Lady—What are those bells ringing for?
Joan—Jump—Because somebody's pulling 'em!

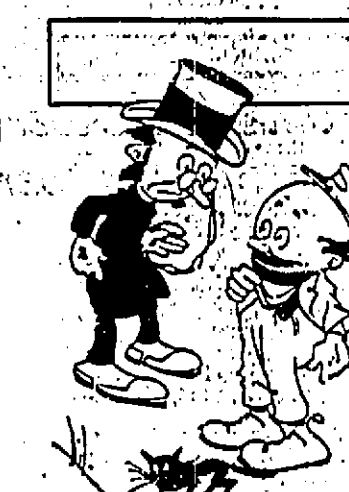

THIS MEAN THING.
"Clara told me that her new gown is going to be a dream. All it will be a dream. Her husband won't give her the money for it."

THE ANSWER CAME.
Dad—Way—I wired the old man. "Where is that money I wrote you for?"
Hedley—That's an answer?
Dad—Yes, the answer reads "I'm inside pocket."

AN ENEMY OF HIRE.
Maude—Miss Jones looks quite well tonight, doesn't she?
Tom—Yes, like a Greekian goddess.
Maude—But not quite so old.

DIDN'T WANT A CHANGE.
Deacon—Just a word, my man, do you believe in predestination?
Mention hand—Nix! You can't get me to change my political.

Hall & Huebel, Proprietors.

MARCH IS THE TIME
FOR PRUNING TREES

George J. Kellogg Sends Another
Letter Full of Helpful Garden
and Orchard Hints.

The Gazette is in receipt of a letter
from George J. Kellogg, the nursery-
man, which contains many sugges-
tions which will be useful to the gar-
dener in the springtime. The topics
of this timely letter mostly with the
work to be done in the month of
March, but are general in well, it
reads as follows:

Editor Gazette:

Now in March is the time to prune
everything in the tree line except the
maples. These should be pruned in
June after the leaves have fallen.
Old orchard trees that have been
neglected should be pruned in spring
before the sap starts; young orchard
trees that are too thick and grow-
ing too fast had better be pruned
about the middle of June—pruning
them will induce the formation of
fruit buds for the following years,
for it is well known that fruit buds
form in June and July for the fol-
lowing season.

The benefit of pruning now is to
remove the limbs crossing each other,
and take out about half the fruit buds
where there are too many. This is an
easier way than to thin the fruit
by hand later in the season.
Then the old trees need the loss
of part of the top to cause them to
put on more vigor, and it will pay to
put on a good supply of straw manure
about each tree as far out as the
branches extend. Don't pile it up
about the tree. Prune out the dead
limbs and thin out the tops of bear-
ing trees so as to let the sun hit
pruned every wound and cut close
enough to the trees so as to leave no
stubs.

Uncover the roses about the 10th
of April and prune back the hybrid
perpetual severely, but don't cut back
the moss roses till after bloom.

Potatoes

I was much surprised last fall
when I came to dig my potatoes in
my garden to find so big a yield. I
have 16 square rods of mounds soil on
the edge of the marsh where the wa-
ter had been so high I had to ridge it
up. On these ridges I planted one
row with Currier No. 3 that went in
at the rate of 75 bushels per acre. On
another ridge I planted four mixed
seed with whole small potatoes. This
I did just to subside the soil (not
expecting much of a yield), but these
two rows went 20 bushels per acre.
I attribute the wonderful yield to the
water supply being 18 to 20 inches
below cultivation, the rich soil, and
the four times I sprayed them.

Now will that seed from such a big
yield be better to plant than common
seed of the same variety? I am hav-
ing my boy test it in Texas, also M. S.
Kellogg at the old home at Janesville
is trying it, and I shall put
some into a farmer's hands near here,
for if pedigree follows in seed it is
worth while to test it.

These potatoes only had hand cul-
tivation, but they were well tended
and well sprayed.

GEO. J. KELLOGG,
Lakota Mills, Wis.

INTERESTING NEWS

FOR BOND HOLDERS

Fraud Complaint Has Been Filed
Against American Guaranty Co.
in Which Local People Are
Interested.

Janesville bondholders will be in-
terested to learn of complaints that
fraud and deception have for years
marked the course of the American
Guaranty company, now in the hands
of a receiver, have been made to the
postoffice department. Several con-
tract holders have complained that
they purchased contracts because of
statements issued by the company
which they now believe to be false.

An agent of the company who sold
contracts in the New England states
has asked that General Stuart, post-
office inspector, investigate and de-
termine whether the company used the
mail to defraud.

The postoffice inspector has not
acted, as he declares that literature
issued by the company has not been
placed in his possession and that until
this is done and the receivers for the
company announce that they be-
lieve the business was fraudulently
conducted the postoffice department
will not take up the case.

However Edwin A. Potter, president
of the American Trust Company bank,
and Frank H. Jones, acting receiver
of the company, yesterday said they
had made no investigation to deter-
mine whether the guaranty company
had been guilty of criminal acts. Mr.
Potter, however, significantly re-
marked that the receiver's statement
would "show a great number of things."

Receiver Silent on Charges.

Mr. Potter also refused to discuss
charges that the guaranty company
had issued financial statements which
have been discovered to be untrue
and that a number of contract hold-
ers had been defrauded by the company
because of these statements.

Attorney Levy Mayer, advisor for
Mr. Potter, said he understood that
a year ago the postoffice department
had received complaints, but that
nothing came of the matter.

One ground of complaint against
the company's methods of doing busi-
ness is founded on the fact that in
statements sent to prospective invest-
ors it was set forth that the com-
pany had a paid-up capital stock of
\$500,000. Since the receivers have
taken hold of its affairs it has been
discovered that the paid-up capital
stock amounts to \$50,000 and that
Charles LaFour Carey, whose sudden
death was the direct cause of the
winding up of the affairs of the com-
pany, owned practically all of this

JANESVILLE GOOD,
BAD & INDIFFERENT

Closely Scrutinized by the Congre-
gational Young Men's Club Last
Evening.

Janesville's city government and its
various institutions, educational and
otherwise, were subjected to a search-
ing inquiry at the session of the Con-
gregational Young Men's club last
evening. The discussion was con-
cerning moral conditions in Janesville.
The program given was as follows:

Powers of Mayor and City Atter-
ney, Jesse Barle, A. M. Fisher

Power of City Council, J. H. Smith

Power of Police Commission, J. H. Smith

Power of Municipal Court, J. H. Smith

Local Conditions, J. H. Smith

Number of Saloons, Billiard halls,
Card rooms; what the law re-
quires and how it is obeyed.

Prof. Stout

Public Schools; number of teach-
ers and pupils, Churches; num-
ber of members, A. H. Griswold

Public Library; number of books;
number of people using the li-
brary, Y. M. C. A.—Members,

benefits, purposes, Mr. Barker

After the program there was con-
siderable discussion of the speeches
given and addresses were made by
City Attorney H. L. Maxfield, Atter-
ney A. E. Matheson and A. M. Fisher,
and by Rev. R. C. Donelson.

The April session will be Ladies'
night. The committee in charge of
the program are C. W. Reeder, Harry
Moore, and Alfred Griswold.

A SUNDAY THOUGHT

The following story came to me not
long ago and has appeared to me no
many times since hearing it, that I
want to tell it to you.

A lady was discussing the price of
a chicken that had served the family
for their Sunday dinner, complaining
at its cost, when the little son, who
had been listening very attentively,
suddenly exclaimed: "Well, it was
worth it, wasn't it?" What a world
of thought the little fellow uncon-
sciously opened up! He had thor-
oughly enjoyed his dinner and, of
course, no matter how high, was of lit-
tle moment, inasmuch as he considered
the dinner well worth its cost. Does
this little story bring anything to you?
There have not been times in your life
when the cost of something desired
has been high, yet the satisfaction
obtained therefrom has made it well
"worth it?" Did you ever hunger for
something that seemed beyond your
reach? The education you so much
desired could not be attained. The
family needs closed the college door
to you. Yet you were determined,
cost what it might, and you did extra
work by day, and kept up your studies
by night until you worked your way
through. Many another fellow would
have given up, "Fritz, it cost an effort,
but it was 'worth it, wasn't it?"

Did you strive for political honors?
There were many others in the race;
all were deserving. But you were de-
termined! There were many sleepless
nights—many hurried days—but you
won in the end. An effort? Yes, but
it was "worth it, wasn't it?"

Then there was the farm left to
you—mortgaged—yet father always
did his best, and you remembered all
his days of toil, without many of the
comforts you have since enjoyed.
Would you let it go, or would you do
your best to save it from strange
hands? It meant work—hard work—
perhaps for a long time. But father
had faith in you. Today you are en-
joying the fruits of your labor and
you forget the time spent in redeem-
ing it as you look with pleasure and
satisfaction at your surroundings.
Surely it was "worth it, wasn't it?"

There is one whose fine business
has in some way slipped from you.

seemed coming his way. There was
the little home on the side street
where he had taken his bride and how
proud he was, for had he not won

JANESVILLE BOWLERS

DEFEAT BELOIT TEAM

Won from Their Opponents by One
Hundred and Sixty-five Points
in Local Alley.

Last night in the Lefschewitz &
Hockett alleys Janesville bowlers de-
feated Beloit by a total of one hun-
dred and sixty-five points. The Janes-
ville men secured their points in the
first two games thus winning the
game. In the first game Janesville
secured a lead of 63 points on the
Beloit men, and in the second game,
by adding 109 more had 172 ahead of
their opponents. In the last game
Beloit had the higher score by sev-
en points, bringing the victory of
Janesville down to 165 points that
they had more than Beloit.

The result of the match games is
as follows:

JANESVILLE.

Dobbin 135 201 222

Hockett 198 168 179

Parker 147 193 149

Osborn 190 161 146

Cook 174 213 199

845 929 895—2609

SEVERAL MOTIONS WERE

HEARD BY JUDGE GRIMM

In Municipal Court Late Yesterday
Afternoon—Has Returned to
Jefferson.

Judge Grimm listened to arguments
yesterday on an objection to the suf-
ficiency of sureties in the action of
Metzger vs. Paul, et al, and in the
end it was decided that another sure-
ty should be added to the bond to
cover costs and judgment on appeal.
In accordance with a stipulation be-
tween the two parties, the case of
the Arizona Lumber Co. vs. D. K.
Jorgis, et al, was dismissed and the
contention will be settled out of
court.

A motion to strike out parts of the
answer in the action of Andrew Olson
of Affton vs. Miller and Mason was
granted. A portion of the answer
was ordered stricken out.

Judge Grimm returned to Jefferson
last evening and will be here again
on Monday.

JANESVILLE GOOD,
BAD & INDIFFERENT

Closely Scrutinized by the Congre-
gational Young Men's Club Last
Evening.

Janesville's city government and its
various institutions, educational and
otherwise, were subjected to a search-
ing inquiry at the session of the Con-
gregational Young Men's club last
evening. The discussion was con-
cerning moral conditions in Janesville.
The program given was as follows:

Powers of Mayor and City Atter-
ney, Jesse Barle, A. M. Fisher

Power of City Council, J. H. Smith

Power of Police Commission, J. H. Smith

Power of Municipal Court, J. H. Smith

Local Conditions, J. H. Smith

Number of Saloons, Billiard halls,
Card rooms; what the law re-
quires and how it is obeyed.

Prof. Stout

Public Schools; number of teach-
ers and pupils, Churches; num-
ber of members, A. H. Griswold

Public Library; number of books;
number of people using the li-
brary, Y. M. C. A.—Members,

benefits, purposes, Mr. Barker

After the program there was con-
siderable discussion of the speeches
given and addresses were made by
City Attorney H. L. Maxfield, Atter-
ney A. E. Matheson and A. M. Fisher,
and by Rev. R. C. Donelson.

The April session will be Ladies'
night. The committee in charge of
the program are C. W. Reeder, Harry
Moore, and Alfred Griswold.

A SUNDAY THOUGHT

The following story came to me not
long ago and has appeared to me no
many times since hearing it, that I
want to tell it to you.

A lady was discussing the price of
a chicken that had served the family
for their Sunday dinner, complaining
at its cost, when the little son, who
had been listening very attentively,
suddenly exclaimed: "Well, it was
worth it, wasn't it?" What a world
of thought the little fellow uncon-
sciously opened up! He had thor-
oughly enjoyed his dinner and, of
course, no matter how high, was of lit-
tle moment, inasmuch as he considered
the dinner well worth its cost. Does
this little story bring anything to you?
There have not been times in your life
when the cost of something desired
has been high, yet the satisfaction
obtained therefrom has made it well
"worth it?" Did you ever hunger for
something that seemed beyond your
reach? The education you so much
desired could not be attained. The
family needs closed the college door
to you. Yet you were determined,
cost what it might, and you did extra
work by day, and kept up your studies
by night until you worked your way
through. Many another fellow would
have given up, "Fritz, it cost an effort,
but it was 'worth it, wasn't it?"

Did you strive for political honors?
There were many others in the race;
all were deserving. But you were de-
termined! There were many sleepless
nights—many hurried days—but you
won in the end. An effort? Yes, but
it was "worth it, wasn't it?"

Then there was the farm left to
you—mortgaged—yet father always
did his best, and you remembered all
his days of toil, without many of the
comforts you have since enjoyed.
Would you let it go, or would you do
your best to save it from strange
hands? It meant work—hard work—
perhaps for a long time. But father
had faith in you. Today you are en-
joying the fruits of your labor and
you forget the time spent in redeem-
ing it as you look with pleasure and
satisfaction at your surroundings.
Surely it was "worth it, wasn't it?"

There is one whose fine business
has in some way slipped from you.
He has lost his grip, although things
seemed coming his way. There was
the little home on the side street
where he had taken his bride and how
proud he was, for had he not won

Craig, Supt.; Young People's meeting, 6 o'clock, leader—Miss Andrea; evening service at 7 o'clock, sermon by the pastor on "The Strength of Jesus."

No Question as to the Superiority of

CALUMET Baking Powder

Received Highest Award World's Pure Food Exposition Chicago, 1907.

Trinity church—Rev. Henry Willman, rector. Second Sunday in Lent. Holy communion, 7:30 a. m.; matins, 8:15 a. m.; liturgy, holy communion and sermon, 10:30 a. m.; Sunday school, 12 m.; evening, 7 p. m. Wednesday, evening and sermon, 7:30 p. m.; Thursday, holy communion, 9 a. m.; Friday, evening, 4 p. m.; Monday, meeting Woman's Auxiliary at home of Mrs. C. E. Hanous, 555 South Main street, 2:30 p. m.

First Church of Christ, Scientist—Regular services are held in Phoenix block, West Milwaukee street. Sunday morning at 10:30 and Wednesday evening at 7:45. The subject of the lesson sermon tomorrow morning is "Man." Sunday school meets at 12 m. Reading room open every day except Sunday from 2 to 4 p. m.

Presbyterian church—Rev. J. W. Laughlin, pastor. Morning worship at 10:30, subject of sermon—A Man of God, a Marked Man; evening service, 7 o'clock, sermon—Mental Healing or the Relation of the Emmanuel Movement to Christian Science. This is the first of a series of sermons to be given on Sunday evenings during the month of March on "The New Psychology and Its Relation to the Church." Russell Williamson will lead the Christian Endeavor society at 6 p. m. and the subject will be Lessons from the Psalms.

Howard's chapel—Sunday school, 2:30 p. m.; C. H. Howard, superintendent; preaching service at 3:30 p. m.; Rev. J. W. Scott, who has agreed to act as supply pastor during the month of March, will preach.

Norwegian Lutheran church—Corner of West Bluff and Madison streets. Wilford A. Johnson, pastor. English services, Sunday morning at 10:30; Sunday school at 12 m.; Norwegian services in the evening at 7:30. All are cordially invited.

Church of the United Brethren in Christ—Corner Milton and Prospect avenues. L. A. McIntyre, pastor. Bible school, 10 a. m.; preaching, 11 a. m.; subject—Book of Revelation, communion service held in connection with morning service; Juniors meet at 3 p. m.; Christian Endeavor, 6 p. m.; Rev. J. A. Richardson, state superintendent, will preach in the evening at 7 o'clock. All are welcome to these services.

There will be services at the United Brethren church tonight. Series of sermons on "The Crisis of the Christ" are being given; special subject tonight and the Transfiguration. Illustrated by stereopticon service begins at 7:30. These services are proving very helpful to all who attend. L. A. McIntyre, pastor.

Gossip is Necessary.

Gossip responds to a human need, and gossip about dead men cannot hurt them. It clearly shows the stuff that reputations below a certain grade are made of. Many of the smaller glories owe their longevity to the laziness of the survivors. For who can afford to be painstaking about such trifles?—Frank Moore Colby.

THEATRE

Repertoire Company Next Week at the Myers Monday evening the Franklin Stock company opens an en-

MISS JUNE AGNDT, LEADING LADY WITH THE FRANKLIN STOCK COMPANY.

engagement, playing the entire week with matinees Wednesday and Saturday.

The Franklin company comes well recommended and presents scenic and sensational plays with vaudeville numbers between acts.

"Wedded and Parted" will be the opening play Monday evening, which "A Daughter of Judah," "Rained Lives," "A Man's Broken Promise," and "Queen of the Highway." A

FORTY YEARS AGO

Janesville Daily Gazette, March 6, 1869.—The rink, scrub skating will be held at the rink tonight for the championship belt and the silver medal.

Fright.—Last night was decidedly cold again, the thermometer indicating five degrees below zero.

A night of horror that will long be remembered in the annals of this city, says the Chicago Republican, has left its lurid and terrible record thrillingly recorded in our columns this morning. In an encounter with the destroyers, whose horrors were enhanced by the intense rigors of the season, four faithful and intrepid firemen have fallen victims in the exercise of a duty whose awful perils are scarcely if ever surpassed on the field of battle. Seven times the alarm bells called out the devoted fire department within the period of yesterday and last evening.

Forty-first Congress.—The House

A Skin of Beauty Is a Joy Forever

DR. T. FELIX GOURAUD'S ORIENTAL CREAM OR MAGICAL BEAUTIFIER

Remove Tan, Pimples, Freckles, Moth Patches, Itch, and Skin Diseases, and every blemish that mars the complexion. Acceptance for United States Patent. Dr. T. Felix Gouraud, 37 Grand Street, New York.

What athletic game?

company of fifteen people make up this organization, are artists of proven ability and talent.

In ladies' night. A complete scenic and electrical equipment is carried for this bill, as well as for all other productions. In the way the management puts it. Other plays to be presented during the week are: "Human Spiders," "The Prince of Lairs," "Libby Prison," "The Boy from the West."

What James O'Donnell Bennett, the dean of Chicago critics, thinks of the famous prima donna, Miss Jeanie Fletcher:

"A charming number that comes early in the bill at the Majestic this week is the ballad singing of Miss Jeanie Fletcher, a young Scotch woman who sings the songs of her land in a ringing mezzo-soprano and with many a fond touch of sympathy. The folk songs of Scotland are the love-liest in the world, and the whole world loves them. Miss Fletcher employs none of the shoddy allure of the ordinary singer, giving the ballads simply and maintaining a graceful dignity of bearing, appearing in plaid. The auditors recall her many times and when, last evening, she gave 'Annie Laurie' as her final selection there was a stillness that was more eloquent of appreciation than the handclapping that had rewarded her rendition of the Jacobite war songs and 'the humorous songs.'"

James O'Donnell Bennett in the Chicago Record-Herald, July 2, 1908.

Miss Fletcher and a high-class company of entertainers will appear in the special return engagement at Myers theatre Sunday evening, March 14. The program will consist of national and international airs and all lovers of a fine concert should be present that evening.

Don't Wait Till Night

The moment you need help, take a candy *Cascaret*. Then headaches, vanish, dullness disappears. The results are natural, gentle, prompt.

No harsher physic does more good, and all harsh physics injure.

Vest-pocket box, 10 cents at drug stores. People now use a million boxes monthly.

The New Cabinet.—Washington, March 5.—The cabinet nominations sent to the Senate are as follows:

Secretary of State, E. H. Washburne, of Illinois; Secretary of the Treasury, A. T. Stewart, of New York; Secretary of the Interior, J. D. Cox, of Ohio; Secretary of Navy, Adolph E. Borah, of Maine; Postmaster-General, J. A. Crowell, of Maryland; Attorney General, E. B. Hoar, of Massachusetts.

Mendelssohn as a Boy.

A quaint description of the boy Mendelssohn is given by one Devrient: "He took his place among the grown-up people in his child's dress, a tight-fitting jacket, cut very low at the neck, over which the wide trousers were buttoned; into the slanting pockets of these the little fellow liked to thrust his hands, rocking his curly head from side to side and shifting restlessly from one foot to the other."

FOUND.

Under this head any person who has found a valuable article and desires to have it returned to its rightful owner, may place an advertisement free of cost, leaving the article at this office to be claimed by the owner who will pay for the ad. If the owner does not call the article will be returned to the finder.

FOUND.—Brown mare, weight 1200 lbs., 8 to 10 years old; came to my place March 2. Owner can have same by proving ownership and paying costs. J. G. Orsogood at the James Little farm, Route 6.

LOST.

If you are unfortunate enough to lose any valuable article, you will find it to see how quickly you hear from it if it is advertised for without delay in the Gazette. Checking up for a period of 75 per cent of the lost articles advertised for have been returned.
